#BEINSPIRED2022

"Every teacher needs to improve, not because they are not good enough, but because they can be even better."

Dylan William

Hear from our school and system leaders, who will discuss the mechanisms that form part of effective professional development in schools, and what they have learnt about how to implement them.

Aim: To support teachers at every career stage to embed research into practice.

Outcomes - by the end of this webinar you will:

- ▶ Have an understanding of key evidence which supports continuous improvement in teaching
- ▶ Have considered strategies to embed this evidence
- ▶ Considered how to overcome barriers that may make embedding research difficult
